

- Eligible customers can obtain Tax Relief on micro-purchases through a Smartphone App called Remonon.
- Customers can upload a valid VAT form at the beginning of each month, pay full-price for individual purchases at various German vendors, and upload respective receipts. The Remonon app will then include all these individual micro-purchases in a monthly summary invoice and reimburse the VAT-Added Tax (VAT) minus trading margins.
- Individual micro-purchases cannot exceed **EUR 240 each (gross, with VAT) per vendor per day.**
- Purchases are combined throughout the month on a single VAT form and must be less than EUR 2,500 per month (net, w/o VAT) in total.
- **Stop by your VAT office to get an Individual VAT Number (IVN) needed to sign up for the Remonon App.**
- The Remonon App is owned and operated by German company NOVAT GmbH, no federal endorsement implied.
